

### **leaching chemical engineering pdf**

In agriculture, leaching refers to the loss of water-soluble plant nutrients from the soil, due to rain and irrigation. Soil structure, crop planting, type and application rates of fertilizers, and other factors are taken into account to avoid excessive nutrient loss. Leaching may also refer to the practice of applying a small amount of excess irrigation where the water has a high salt content ...

Concrete degradation may have various causes. Concrete can be damaged by fire, aggregate expansion, sea water effects, bacterial corrosion, calcium leaching, physical damage and chemical damage (from carbonatation, chlorides, sulfates and non-distilled water). This process adversely affects concrete exposed to these damaging stimuli.

Professor Jacques Eksteen says this process should make many low-grade copper-gold leases throughout WA commercially viable. Using the amino acid glycine to extract gold, he says, has many advantages over the traditional cyanide and sulphuric acid treatments. "It's a bulk chemical, it's affordable and it's benign," Prof Eksteen says.
